

[Company overview](#) | [Science-first consulting](#)

We help life science teams connect laboratory work, software, and operational execution - with clarity before scale.

SCIENCE

Assay development, validation support, workflow optimization, data review, and evidence-based technical decisions.

SOFTWARE

Custom web applications, dashboards, data portals, LIMS-style workflows, and automation tools built around scientific work.

OPERATIONS

Fractional COO support, vendor coordination, process design, project management, and execution cadence.

WHAT WE DELIVER

What MedPro can do for you

Bridge science and software

Translate lab constraints into software requirements so tools match how scientists work.

Strengthen R&D evidence

Organize technical narratives, documentation, and project evidence around real eligible work.

Build practical digital systems

Create portals, data workflows, dashboards, and automation that reduce manual effort.

Add senior operating capacity

Fractional COO structure for priorities, vendors, milestones, and cross-functional execution.

FIT & ENGAGEMENT

Best fit

- Biotech & diagnostics teams
- Contract research and lab services
- Health tech and scientific software
- Seed to Series B R&D companies
- Teams preparing SR&ED claims

Engagement models

Hourly advisory

Targeted answers and decision support.

Monthly retainer

Embedded operating rhythm and accountability.

Scoped project

Fixed outcome, timeline, and handoff pack.

HOW WE START

01

30-minute discovery call

02

Scope & strategy

03

Execution cadence
